Applied Geography (1982), *2*, 79–80
© 1982 Butterworths

Index to 1981 volume

Author and title index

Actual and potential flood damage: a case study for urban Lismore, NSW, Australia (Smith, D. I.) 31–39
Agricultural potential in the developing countries (Spedding, C. R. W.) 157–166
Applied geography, quantitative analysis and ideology (Johnston, R. J.) 213–219
Approach to the delimitation of planning regions (Johnston, R. J. and Rossiter, D. J.) 55–69
Assessing landscape attractiveness: a comparative test of two new methods (Kane, P. S.) 77–96

Briggs, D. J. Editorial. The principles and practice of applied geography 1–8
Brockington, N. R. *see* France, J.
Burbridge, P., Dixon, J. A. and Soewardi, B. Forestry and agriculture: options for resource allocation in choosing lands for transmigration development 237–258

Chartres, C. J. Land resources assessment for sugar-cane cultivation in Papua New Guinea 259–271
Coleman, R. Footpath erosion in the English Lake District 121–131
Curran, P. J. Remote sensing: the use of polarized visible light (PVL) to estimate surface soil moisture 41–53

Day, R. A. and Walmsley, D. J. Residential preferences in Sydney's inner suburbs 185–197
Dixon, J. A. *see* Burbridge, P.
Drake, J. J. Effects of iron mining on surface water quality in the Schefferville area 287–296

Editorial. The principles and practice of applied geography (Briggs, D. J.) 1–8
Effects of iron mining on surface water quality in the Schefferville area (Drake, J. J.) 287–296

Food as a weapon? The embargo on grain trade between USA and USSR (Tarrant, J. R.) 273–286
Footpath erosion in the English Lake District (Coleman, R.) 121–131
Forestry and agriculture: options for resource allocation in choosing lands for transmigration development (Burbridge, P. *et al.*) 237–258
France, J., Brockington, N. R. and Newton, J. E. Modelling grazed grassland systems: wether sheep grazing perennial ryegrass 133–150

Gauld, J. H. The soils of Culbin Forest, Morayshire: their evolution and morphology, with reference to their forestry potential 199–212
Gilbertson, D. D. The impact of past and present land use on a major coastal barrier system 97–119
Gurnell, A. M. Mapping potential evapotranspiration: the smooth interpolation of isolines with a low density station network 167–183

Impact of past and present land use on a major coastal barrier system (Gilbertson, D. D.) 97–119

Johnston, R. J. Applied geography, quantitative analysis and ideology 213–219
Johnston, R. J. and Rossiter, D. J. An approach to the delimitation of planning regions 55–69

Kane, P. S. Assessing landscape attractiveness: a comparative test of two new methods 77–96
Kent, M. and Smart, N. A method for habitat assessment in agricultural landscapes 9–30

Land resources assessment for sugar-cane cultivation in Papua New Guinea (Chartres, C. J.) 259–271

Mapping potential evapotranspiration: the smooth interpolation of isolines with a low density station network (Gurnell, A. M.) 167–183

Method for habitat assessment in agricultural landscapes (Kent, M. and Smart, N.) 9–30
Modelling grazed grassland systems: wether sheep grazing perennial ryegrass (France, J. *et al.*) 133–150
Mottershead, D. N. The persistence of oil pollution on a rocky shore 297–304

Newton, J. E. *see* France, J.

Persistence of oil pollution on a rocky shore (Mottershead, D. N.) 297–304
Principles and practice of applied geography (Briggs, D. J.) 1–8

Remote sensing: the use of polarized visible light (PVL) to estimate surface soil moisture (Curran, P. J.) 41–53
Residential preferences in Sydney's inner suburbs (Day, R. A. and Walmsley, D. J.) 185–197
Rossiter, D. J. *see* Johnston, R. J.

Smart, N. *see* Kent, M.
Smith, D. I. Actual and potential flood damage: a case study for urban Lismore, NSW, Australia 31–39
